Fixed specification
24 h × 84 values + masks
Patient splits; four tasks
Three regimes; five seeds
Objective interface
forward(values, mask)
→ loss + diagnostics
MAE · JEPA · contrastive
Encoder transfer
Save encoder + config
Probe / fine-tune heads
Validation-selected tests
Auditable results
Run-level CSV + hashes
Pair seeds; reject drift
Rebuild tables and figures
New objective: implement → register → synthetic smoke → compare declaration → new result revision
